

LHC experimental beampipes meeting 1st April

- beampipe between D1 and D2 in IR2
- ZDC to be installed around recombination chamber
- some geometry changes
- waiting for aperture confirmation by B. Jeanneret?
- talks by C. Rathjen and D. Macina
- P. Chiggiato asked if NEG coating is necessary
- TCT collimator position undecided, could prove a background source for Alice
- statement that ion loss maps cannot be provided and that estimate not possible for ions
(I checked with Hans afterwards, and he disagrees)
- vacuum group resources are extremely stretched
- DG asks for more aggressive planning
- next meeting 3 June on IR5
